

careers4students.co.uk
connecting career seekers with career makers

Careers4students.co.uk is an interactive student job board connecting career seekers with career makers. The site offers apprenticeships, internships and graduate career opportunities for college leavers, undergraduates and graduates.

"I would challenge all employers to look at their workforce and consider what an injection of enthusiasm and energy junior support may provide" Chairman – Capgemini UK

Features

1. Connecting with Students

Student and company profiles are created allowing students to follow companies and be updated with new jobs, news and events.

Student profiles will contain information on their education and experience, however the focus of the profiles is to allow students to showcase their personality and interests also.

2. Video Jobs

Request a 2 minute video to support the students application.

This allows you to see the candidates personality and presentation skills before bringing them in for a lengthy interview process – effectively removing the first stage interview process.

3. Search and Headhunt Students

Search the C4S database for the perfect candidate and then headhunt them for your vacancy. This allows you to be proactive and target the top talent.

Search talent by:

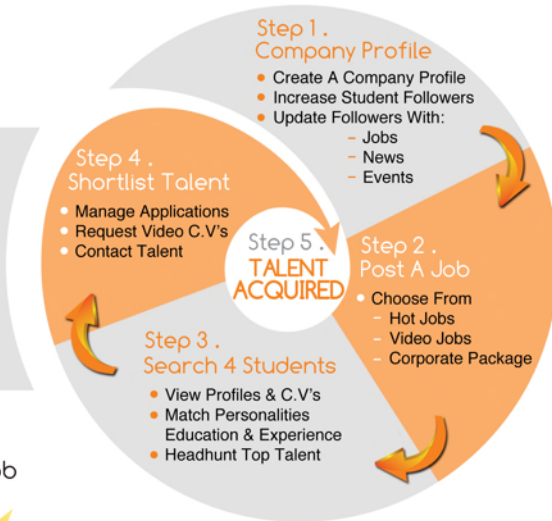

- Location
- Institution
- Level of study
- Course
- Grade

4. Manage Application

Our Application Management System allows you to shortlist and manage your applications. You can green flag strong candidates, amber flag candidates your not sure on and red flag candidates that don't meet your criteria. An automated response will be sent to all unsuccessful candidates, preventing your brand from being damaged through a lack of response.

How It Works

Options

Post A Job

- Quick job
- Video job
- Hot job

Packages

- Recruiter database package
- Corporate package

Annual Membership

- 12 months
